## 24-Hour Web Access for Your Customers

### 24-Hour Customer Service

*Dancik Décor 24 improves customer service, frees your staff from routine tasks and lets your stock sell itself - day or night.*

Décor 24 is a complete business-to-business (B2B) web application letting you provide 24-hour web access to your customers. They can place orders, check your stock, check their order status, get pricing information, and more. Décor 24 automates routine inquiries and lets your staff concentrate on customer service. Décor 24 can also function as a complete stand-alone web-site, including links to your suppliers and other web-pages.

### Order Entry

Customers can search for items by number, description and category. Décor 24 can also display product specifications and installation instructions, as well as prompt customers to order complementary products.

### Order Status

Customers can see real-time status of all their open orders, as well as a history of shipped orders. Orders can be searched by customer purchase order number, by reference number, or by a special tag line that your customer can enter with each order. Your customers can print their own open order listing and order acknowledgements.

### Price List and Catalog Download

Customers can access price lists and catalogs, thus eliminating a costly process for your sales and marketing department. The product pricing provided is tailored to the authorized user. Formats can be in standard MS Excel, MS Word, or HTML Text. Décor 24 can integrate with Dancik's Channel Management Solutions, which enables your customer to download catalog files using the Flooring Industry B2B Standards.

### Promotions and Specials List

A feature is available to advertise any specials, clearances, promotions, odd lots and remnants. Décor 24 provides a banner ad capability with summary data, and a detailed display of marked down inventory for your customers to view and order. This online "specials list" includes extensive search criteria, such as specified price ranges, quantity and size ranges, and product categories.

### Security

Unique customer passwords and profiles combined with security firewalls protect against unauthorized access.

### Customization

You can customize your site by adding your company logo, color schemes and marketing information. Add Dancik's Image Builder<sup>®</sup> so your customers can use their web browsers to view your products in photo-realistic, authentic settings.

Save Password

**Complete navigational flexibility** with full access to the browser's navigation buttons to let you move BACK and FORWARD between pages of the website with ease.

Your customer's name and account number shows here.

Your company name, logo, and color scheme shows here.

Support for multiple accounts and stores under one user id. Your customers use a simple drop down list to switch between their accounts and stores.

New powerful **Product Search** does the work for you. Search on a partial product name, color number or color description... just about any fragment of information and it will find all the hits in your product database and come back with the inventory summary by item in seconds.

Easy to read Product Knowledge information screens are automatically displayed at the bottom of every stock check screen.

The **Related Items** button gives you all the related accessories, such as the matching trim, molding, underlayments, and adhesives.

Your customers can be assigned to, or choose between our Automatic or Manual Inventory Selection options. The Automatic option brings all of the benefits of ISO to Décor 24.

Display inventory in any unit of measure.

Logon screen allows you to save your userid and password for "one click" sign-on in all subsequent visits. Nothing to remember or enter, as long as you are on the same PC.

Search on **Specials**, drops, and marked down inventory using a powerful search engine.

Display Open Orders with complete line by line order detail. Also display up to 3 years of invoiced orders.

Show your customers their **Purchase History** from your company in dollar value for the last 24 months, year over year and month over month.

Easy-to-use "**Shopping Cart**" design lets you build orders just like Amazon.com. You decide when you want to take your Shopping Cart through the Checkout. It is easy to add and delete items from your cart.

Various built in e-mail templates allow your customers to contact inside staff by email, including requests for Proof of Delivery, Samples and more.

Set up your own customized links.

You can display generic or customer-specific price lists that can be downloaded to your customer's PC.

Internet

Décor 24 users can create links to other web applications including other Dancik products, such as Image Builder®.

Décor 24 and Image Builder® may be purchased and installed separately or together.

If you have purchased both products - Décor 24 and Image Builder® - they may be combined into a powerful, one-stop shop for your customers. Décor 24 can display Image Builder images, while Image Builder® can build orders visually and "drop" them into the Décor 24 shopping cart.
