

PRICE LIST MANAGER

Features:

- Up-to-Date Price Lists
- Up-to-Date Inventory
- Fully Searchable Catalogs
- And much more.

PRICE LIST MANAGER

Designed around the Floor Covering Business to Business Association (www.fcb2b.org) standard for 832 Price Catalogs, Dancik Price List Manager enables an aligned retailer or contractor, regardless of their back-end business management system, to download 832 Price Catalog data from a manufacturer or distributor that uses Dancik's B2B modules. The program converts that data into a fully searchable store-level price list that can be used in daily business.

This product includes two seamlessly integrated components: the Price List Manager and the Price List Manager Viewer.

With Dancik Price List Manager your customers can:

- Download your fcb2B-format 832 Price Catalog;
- Create a customized and fully searchable price list based on the cost of goods shown in your 832 Price Catalogs that are downloaded;
- Select which products from the catalog will show in their price list;
- Specify the margin amount, selling unit of measure, item name, and item SKU that will show in their price list (thereby supporting private label selling at the store);
- Publish fully searchable selling price lists for use by sales personnel. The search is a 'smart' search that supports partial words;
- View catalog information on item, item price history, related products, and more.

With Dancik Price List Manager Viewer, salespeople can:

- Display the fully searchable price lists created without access to supplier cost information;
- Find products by keying any word (or partial word) associated with the product;
- View current and accurate prices, including promotional prices.

Dancik Price List Manager and Viewer connect to Dancik Décor 24®, a web-based data access and order placement system, so users can view the following information:

- Basic item information directly from your system
- Bill of material / related products information
- Available inventory in real-time view
- Product knowledge and specifications
- Photo of the product (using either a link to Dancik Image Builder®, or a link to a network photo library)

Minimum Software Requirements for Distributors and Manufacturers:

- Dancik CMS or other fcb2B-compliant software must be installed and configured on the ERP system of the distributor or manufacturer.
- For connection to Dancik Décor 24, the distributor or manufacturer has Dancik Décor 24 installed and configured and has provided the retail customer with a log-in ID and password.*
- For image display within Dancik Décor 24, Dancik Image Builder must be installed and configured, or Dancik Décor 24 is linked to an image library stored on the network.*

Minimum system requirements for retailers, contractors and other end users:

- Pentium 4 processor operating under Windows XP, Windows Vista, or Windows 7.
- Minimum of 1.0 GB of RAM.
- Minimum of 4.0 GB of available disk space.
- 1024 x 768 screen resolution.
- CD-ROM drive.
- Internet access.

* Dancik Décor 24 and Dancik Image Builder are not required to run Dancik Price List Manager.
